# Executive Summary

---

For Spokane Transit to ensure the reliability, consistency, and proper development of its transit services, it must continually evaluate and understand the strengths and weaknesses of the products offered. Each year STA publishes a Fixed Route System Performance Report to inform Spokane Transit staff, the public, and Board of Directors of the performance of each route compared to three performance standards: Ridership, Equivalent Energy Consumption, and Fares. In addition, the report provides information regarding passenger facilities including bus stop level ridership, park & ride lot utilization, and passenger facilities projects delivery. In 2023, Spokane Transit carried 8,947,157 passengers which marked a 35.94% increase compared to 2022. Spokane Transit’s identified goal for fixed route ridership was to increase ridership from 2022 by 20.6%.

At the end of 2023, STA had 51 bus routes including three new routes that were added in July 2023. The introduction of the City Line (Route 1) in July required some duplicitous service to be discontinued. All of Route 29 and much of Route 39 (aside from a loop route in the Minnehaha neighborhood) was eliminated. Route 14 took over a portion of Route 29 on Napa Street south of Mission Avenue to downtown and was combined with the service that used to be provided by Route 42 on the lower South Hill. Finally, a new route (Route 247) was implemented which combined peak service on Route 45 with a return to service on 17<sup>th</sup> Avenue to provide AM and

PM peak service between downtown Spokane and Lincoln Heights neighborhood and Ferris High School.

In 2023, 44 of the 48 routes that were in service for the entire year had increases in ridership productivity (measured in boardings per revenue hour). STA ridership has improved over the past two years as ridership recovers from the COVID-19 pandemic. In 2021, all but three routes had *decreases* in ridership productivity. 2022 saw increases in ridership on 38 of 44 year-round routes. Ten routes did not meet the ridership benchmark which is adjusted each year relative to all ridership. While this marks a regression when compared with 2022 when five routes did not meet the benchmark, the overall increase in productivity drives a higher expectation for each route. Overall, 26 of 53 routes evaluated met all three established performance standards for Ridership, Equivalent Energy Consumption, and Fares (up from only six routes in 2022). Per *Connect Spokane* any route that falls below the minimum standard for any one standard for two consecutive years will be considered to have Area of improvements. Twenty-one routes are identified as having Area of improvements and a remediation plan is proposed in this report.

Per *Connect Spokane* FR 2.1 Geographic Extent, service shall be available within no more than one-half mile of at least 80% of the Public Transportation Benefit Area (PTBA) population residing within urban areas. Within the service area, urban areas include the City of Spokane, Spokane Valley, Millwood, Airway Heights, Liberty Lake, Medical Lake, and Cheney. Historically, STA has utilized a simple ½ mile buffer around every stop within the PTBA. In 2023, an estimated 81% of the urban PTBA population, 370,144 people, resided within one-half mile of a bus stop. It should be noted that because of the 2020 Census reflecting the continued growth of the region, the area considered urbanized by the Census was enlarged.

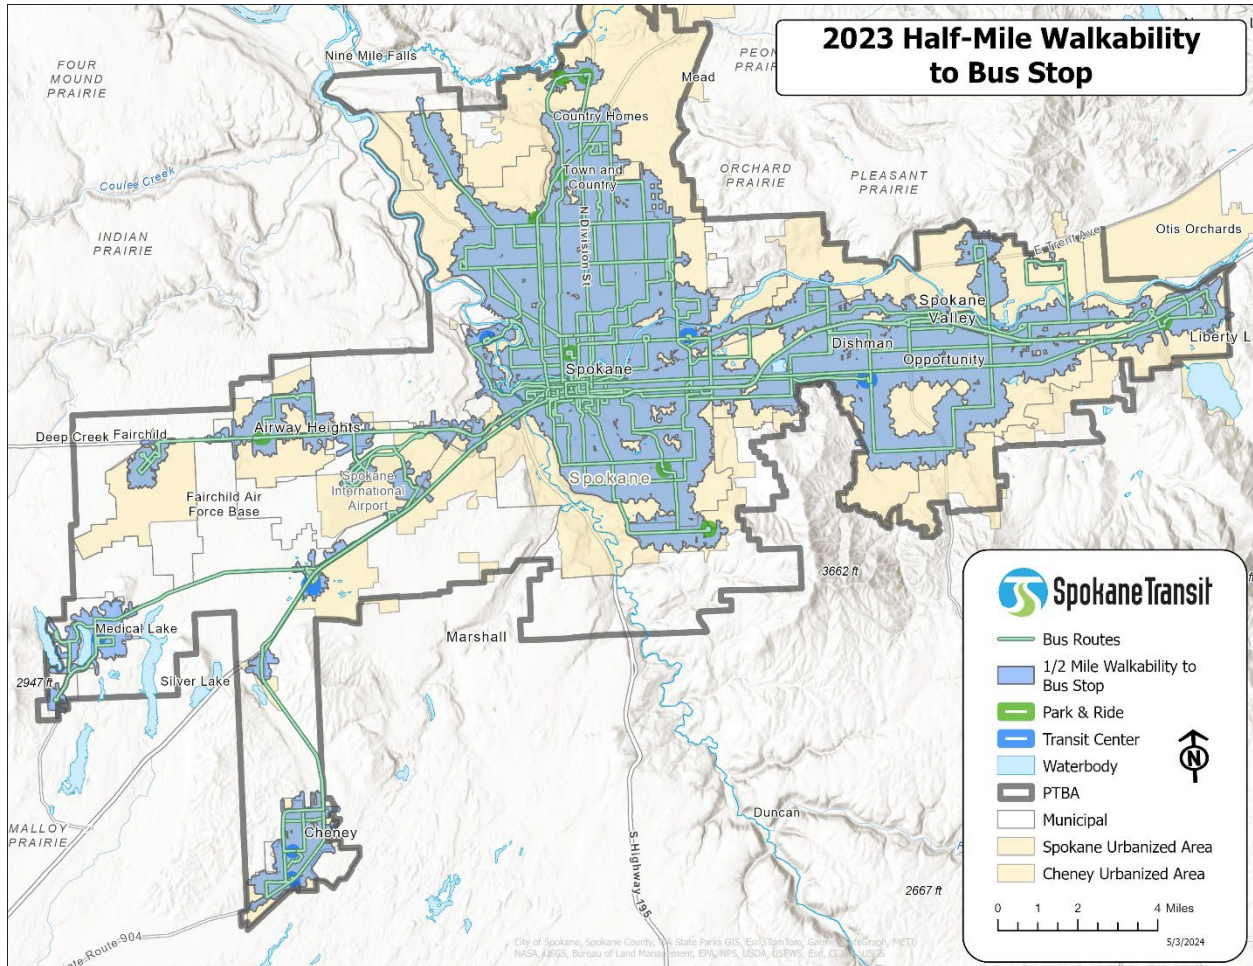

**Figure 1**

ESRI, NASA, NOAA, USGS, Spokane County, Washington State GIS, Esri, Trimble, Garmin, SafeGraph, MET/NASA, USGS, Bureau of Land Management, EPA, NPS, USDA, USFWS

Staff also analyzed the percentage of the population that lives within a half-mile walking distance of a bus stop. For this analysis, the roadway network defined the pedestrian network as well. Therefore, this analysis does not include any existing trails (developed or undeveloped) or recognize the ability of pedestrians to utilize routes (through parking lots, etc.) that are not available to motor vehicles. Using this analysis method, an estimated 72% of the urban PTBA population, 330,421 people, reside within one-half network mile walk distance of a bus stop.

Figure 2

At the end of 2023, Spokane Transit had 1,680 bus stops in service. All transit centers and park & ride lots offer passenger shelters in addition to 162 other bus stops throughout the system where ridership activity and other considerations warrant passenger shelters. Spokane Transit operates 14 park & ride locations within the service area. Eight are owned by Spokane Transit while the remaining six are made possible by lease or cooperative agreement. Approximately 58% of passenger boardings in 2023 occurred at a stop or facility where a shelter is provided to customers. This is a drop from previous years' reports. The reason can likely be attributed to an increased distribution of ridership across the network. Despite an increase of sheltered stops,

park and ride boardings and usage is lower than in the past whereas there is an increase in usage of “walk-to-transit” type stops. This increase has been seen especially drastic at low or moderate used stops and among students since the implementation of a fare-free youth policy.

# Section I: Route Performance

---

## Route Performance Overview

In December 2009, the Spokane Transit Board of Directors adopted the Fixed-Route Service Design Guidelines to guide the planning, implementation, and monitoring of fixed-route transit service to guide Spokane Transit staff through the 2010/2011 service reductions. These guidelines and standards were ultimately merged into the Fixed Route element and Annex I Fixed-Route Performance Standards contained in *Connect Spokane: A Comprehensive Plan for Public Transportation* adopted by the Board of Directors in July of 2010.

An essential part of the required performance monitoring is to evaluate operating data for the prior year of service. This section uses operating data from 2023. As a snapshot of the system and individual routes, this report is an essential tool for evaluating and planning improvements in transit service.

Routes are rated annually against three performance standards: Ridership, Comparable Energy Consumption, and Fares. Each of these standards has a benchmark score which is calculated annually. A route which meets a performance standard's benchmark in either or both previous two years is considered to meet that performance standard. (In other words, a single year of substandard performance is not considered a failure in this report.)

The Appendix shows a table comparing 2023 with 2022 and summarizes whether each route passed or was unable to meet a particular benchmark. Furthermore, it is noted under the Consecutive Year Analysis section whether a route did not meet a performance measure for consecutive years.

## Route Performance Standards

As stated in *Connect Spokane*, any route that falls below the minimum standard for any one of the three performance standards for two consecutive years will be considered to have Area of improvements. The Consecutive Year Analysis section contains a list of routes with unmet benchmarks. New service will be evaluated following its development period, typically 18 to 24 months. A partial year of operation (e.g., if a route begins operating in May or September) will not be counted against a route's benchmarks with these standards. This applies to routes 1, 14 and 247 which began service in July 2023 (full 24 months in July 2025).

As stated previously, the performance standards measure the success of the fixed-route service based upon the three performance standards. Routes are compared against annual benchmark

scores set for routes similar in-service type and/or vehicle types. The service types and performance standards used are explained below.

### **Performance Standard I: Ridership**

Ridership is a critical metric for evaluating the system’s effectiveness to serve people and the places to which they travel. STA may desire to serve a particular facility, location, or community, but the route may still struggle to meaningfully attract ridership. In such cases, it is important to identify why the route is not performing well and what steps can be taken to remediate the route. See Consecutive Year Analysis section for a remediation plan for routes with unmet benchmarks.

One of the best indicators of potential performance is a route’s relation to the CBD (Central Business District). A route which serves the CBD has more connectivity than other routes. Consequently, it must meet higher expectations due to the downtown Plaza’s finite number of bus bays and overall capacity. Accordingly, use of the Plaza’s capacity should be focused on routes with a higher level of effectiveness in terms of ridership.

The metric used for ridership is Boardings per Revenue Hour. Revenue hours represent the hours the bus is in service. Boardings per Revenue Hour are calculated by dividing the annual boardings of a route by the annual revenue hours of that same route. During the COVID-19 pandemic, STA made a conscious decision to keep revenue hours relatively stable as opposed to cutting service to allow passengers to maintain on-board social distancing. The chart below shows the 15-year comparison of total annual revenue hours (2009-2023) for fixed-route service.

Figure 3

Ridership benchmarks are based upon the average Boardings per Revenue Hour for all basic routes that intersect the CBD.

Ridership benchmarks for specific service types are calculated as follows:

- Basic routes intersecting the CBD must meet a minimum ridership benchmark that is one-half standard deviation below the average of the basic CBD routes. In 2023 that average was 18.6 Boardings per Revenue Hour. This equates to a benchmark of 10.64 Boardings per Revenue Hour. This benchmark was 6.27 in 2022.
- Basic routes NOT intersecting the CBD must meet a minimum ridership benchmark one-half that for basic routes that do intersect the CBD. This equates to a benchmark of 5.32 Boardings per Revenue Hour in 2023. This benchmark was 3.14 in 2022.
- Commuter Peak routes must meet a minimum ridership benchmark one-half standard deviation above the average of the basic routes. This equates to a benchmark of 19.15 Boardings per Revenue Hour in 2023 (15.67 in 2022). For routes that operate as a function of what would otherwise be out-of-service time on a route (“Commuter Peak – Subordinate”) the standard is equal to one-third the Commuter Peak benchmark. For 2022, this equates to a benchmark of 6.38 Boardings per Revenue Hour (5.22 in 2022). STA may consider modifying the calculation of the Commuter Peak standard because it continues to be a challenge for express routes to meet the standard.

## Performance Standard 2: Equivalent Energy Consumption

There is great potential in the use of mass transit over the personal automobile to conserve energy and lessen human impact on the environment. Typically, energy consumption is shown by the number of single-occupancy vehicle (SOV) trips avoided using mass transit, but this measure does not consider that a transit bus is much heavier than a personal vehicle and consumes more energy per vehicle mile.

The Equivalent Energy Consumption standard relates to the duration of a passenger’s ride time on a vehicle. As stated in *Connect Spokane*, a bus route should at minimum perform equally to the private automobile in terms of energy consumed per mile traveled for each passenger. The private automobile is improving in efficiency each year. For example, in 2000 the average automobile fuel economy in terms of miles per gallon was 20 mpg and has since increased to 23.7 mpg in 2021 (the most recent data available). It should be noted that previous performance reports used MPG and passenger load data for passenger cars only. Going forward, bus data will be compared against data for all passenger light vehicles (car, light truck, van, SUV, etc.) as passenger car production shares make up less than 40% of new vehicles produced (compared to nearly 60% in 2000).

The energy consumption for each passenger mile of a route will vary by the typical vehicle size and vehicle type used for each route. Below is a table that shows typical vehicle types assigned to Basic and Commuter Routes and their required minimum average load factor. Basic Routes must meet an average load factor that results in the route being as energy efficient as a typical single occupancy vehicle (SOV). The benchmark for Commuter Routes is higher than that for Basic Routes and must be as energy efficient as the average-loaded private automobile.

Table 1

Average Load Factor Benchmarks		
	Basic Routes	Commuter Peak Routes
Vehicle Type	2023	2023
30' Bus	6.20	10.35
35' Bus	4.57	4.54
40' Bus	4.57	4.44
60' Bus	6.61	11.04
60' City Line BEB	2.51	N/A

The average passenger load (load factor) of a route is calculated by dividing the annual passenger miles of a route by the annual platform miles of a route. Passenger miles are the cumulative sum of the distances ridden by each passenger, while platform miles represent all

miles the vehicle travels, both in- and out-of-service. STA may consider modifying the approach to this standard to better reflect transit's environmental benefits and impacts. For instance, in this report STA has modified the approach for the battery electric bus benchmark. Annual kilowatt hours of service energy were converted into a comparable gallons-of-diesel-burned equivalent. Calculations were made to determine the miles driven per kilowatt hour of energy used and the equivalent BTU's per mile were calculated from that.

### **Performance Standard 3: Fares**

STA collects fares in the form of cash, passes and institutional pass programs which STA administers. Farebox recovery represents the revenue collected along a route as a percentage of the total cost of operating the route. Fares per passenger are not the same for every route. Two routes with the same ridership could have very different farebox recovery ratios based on fare media and operating costs.

The Fares performance standard uses a route's farebox recovery ratio to show the relationship between fares collected versus the operating cost of a route. Farebox recovery ratio is calculated by dividing the annual fare revenue by the annual unallocated cost (the cost of the route and associated support). The benchmark which must be met or exceeded is equal to one-half the system-wide average (for revenue allocated to routes) farebox recovery ratio. The 2023 system average was 8.89% (a 13.08% reduction from 10.22% average recovery in 2022), creating a benchmark of 4.44%. The system average fare calculated for this measure does not incorporate fare revenue which cannot be confidently allocated to any route.

In 2022, the Move Ahead Washington transportation package was passed by the Washington State Legislature. In that package was a Transit Support Grant which provides approximately \$1.45 billion to state transit agencies that adopted a youth zero-fare policy. In the fall of 2022, Spokane Transit adopted a zero-fare youth policy and instituted routes (open to all passengers) that provide targeted service to area high schools. These routes (223 & 294) have a higher proportion of youth riders and as such do not perform as well at the farebox in relation to rides given and may struggle with these cash-fare benchmarks. It should also be noted that many other routes in the system are heavily utilized by students (such as routes 4, 33, and 247) where there can be more free rides given than "paid" rides, especially at certain times of day. Due to this factor, the Fares benchmark may warrant reexamination in future years.

### **Summary of 2023 Route Performance**

A route will be considered to have been unable to meet a performance standard if it has unmet benchmarks for two consecutive years. Further detailed analysis is contained in the coming

section titled Consecutive Year Analysis. This includes a watch list of routes that may require corrective action in the future. As noted, it will be difficult for some routes to meet the Equivalent Energy Consumption Standard due to the short route length thereby producing very low average trip lengths which produces lower annual passenger miles. Furthermore, some routes have excess revenue hours because they take on more recovery/layover time for partner routes within the interline causing the partner routes to perform better. It is important to take this into deliberate consideration when proposing potential service changes that would improve performance.

### Fixed-Routes Meeting All Three Standards

Much more improvement was seen in 2023 vs 2021 when Route 90 was the only route that met STA’s standards for Ridership, Equivalent Energy Consumption, and Fares. In 2022, Routes 29, 61, 66, 662 & 663 joined route 90 as the six routes that meet all three standards.

Twenty-five routes met all three standards in 2023. Those routes are 1, 4, 12, 20, 22, 23, 25, 26, 27, 28, 29, 32, 39, 45, 60, 61, 66, 90, 94, 95, 96, 97, 98, 662 and 663. Refer to the Appendix for a detailed breakdown of each of the three performance standards for all routes and for a table comparing 2023 with 2022 that summarizes whether each route passed or was unable to meet a particular benchmark for each year.

### Consecutive Year Analysis

Standards imply accountability, comparison, and remediation in the event of unmet benchmarks. As stated earlier, any route that falls below the minimum standard for any one of the three performance standards for two consecutive years will be considered to have unmet benchmarks. A partial year of operation (e.g., if a route begins operating in May or September) will not be counted against a route’s benchmarks with these standards.

### Improvement Watch List

The table below shows the current watch list of routes with unmet benchmarks for two consecutive years. The “X” indicates what standard the route was unable to meet for consecutive years. For reference, the “NM” indicates what standard the route was unable to meet for a single year. It should be noted that Routes 35, 36, 724 and 771 did not operate for a full year in 2022.

Table 2

Route	2023 Standard Not Met			2022 Standard Not Met		
	Ridership	Energy	Fares	Ridership	Energy	Fares
11	NM				X	

Route	2023 Standard Not Met			2022 Standard Not Met		
	Ridership	Energy	Fares	Ridership	Energy	Fares
21		X			X	
33		X			X	
34		X	X		X	NM
35		X			NM	
36		X	X		NM	NM
42		X			X	
43		X			X	
62		X	X		X	X
63		X			X	X
67		X	X		X	NM
68		X			X	
74	NM	X			X	
124	X	X		X	X	
144	X	X		X	X	X
172	X	X		X	X

633		X			X	
661		X			X	
664	NM	X			X	
724	X	X		NM	NM	
771	X	X		NM	NM	

**Performance Improvement Concepts**

The below table outlines the concepts for performance improvement related to each of the routes that did not meet one or more standard for consecutive years. Many of these routes have been on the list for several years. However, as discussed above, the recovery from the pandemic continues to impact the recovery of express routes.

Table 3

Route	Improvement Concepts
<b>11 Plaza/Arena Shuttle</b> Areas of improvement: Ridership, Energy	Continue to monitor and work with Downtown Spokane Partnership, the third party in the contract with STA and the Public Facilities District, to pursue strategies to re-invigorate marketing to downtown businesses that benefit from this service. This is one of the few routes to see a decline in ridership for 2023. The route operates from a new parking facility north of Boone Ave, with routing that serves Main Ave (one block from Plaza). Night/weekend service was introduced to this route in May 2024.

Route	Improvement Concepts
<b>21 West Broadway</b> Area of improvement: Energy	Continue to monitor. Consider modifying energy benchmark. Route is a candidate for future electrification.
<b>33 Wellesley</b> Area of improvement: Energy	Continue to monitor. Consider modifying energy benchmark.
<b>34 Freya</b> Area of improvement: Energy, Fares	Continue to monitor. Consider modifying energy benchmark.
<b>35 Francis/Market</b> Area of improvement: Energy	Continue to monitor. Route has improved since introduction in 2022.
<b>36 North Central</b> Area of improvement: Energy	Continue to monitor. Route has improved since introduction in 2022.
<b>43 Lincoln/37<sup>th</sup> Ave</b> Area of improvement: Energy	Continue to monitor. Consider modifying energy benchmark.
<b>62 Medical Lake</b> Areas of improvement: Energy, Fares	Route made the ridership benchmark in 2022. Historically, this route has never performed well in the measured metrics. However, maintaining the only bus route to the City of Medical Lake and the State Hospitals despite low metrics has been the guidance of the STA Board in the past.
<b>63 Airway Heights/West Plains</b> Areas of improvement: Energy	Continue to monitor. 2022 was the first full year the route operated on Geiger Blvd as designed (route was on detour due to construction). The route is planned to be modified to provide a faster trip to Airway Heights along Hayford Rd which could improve performance starting in September 2024.
<b>67 Swoop Loop</b> Area of improvement: Energy, Fares	Continue to monitor. Energy standard will be difficult to meet due to the short route length thereby producing very low average trip lengths which produces lower annual passenger miles. Passengers can only travel limited distances on this route.
<b>68 Cheney Loop</b> Area of improvement: Energy	Continue to monitor. Energy standard will be difficult to meet due to the short route length thereby producing very low average trip lengths which produces lower annual passenger miles. Passengers can only travel limited distances on this route.

<b>Route</b>	<b>Improvement Concepts</b>
<b>74 Mirabeau/Liberty Lake</b> Area of improvements: Energy	Continue to monitor. Consider modifying energy benchmark. Routing may be modified before September 2024 sign-up to reduce excessive deadhead maneuvers.
<b>124 North Express</b> Areas of improvement: Ridership, Energy	Continue to monitor. Ridership decreased considerably due to the COVID-19 pandemic. However, 2023 saw a 104% increase in Boardings Per Revenue Hour over 2022.
<b>144 South Express</b> Areas of improvement: Ridership, Energy	Continue to monitor. Post-pandemic recovery continues on STA's express routes as they strive to recover riders. Ridership on Route 144 saw a 70% gain in ridership from 2021 to 2022 and a 42% increase from 2022 to 2023.
<b>172 Liberty Lake Express</b> Areas of improvement: Ridership, Energy	Continue to monitor. Post-pandemic recovery continues on STA's express routes as they strive to recover riders.
<b>173 VTC Express</b> Area of improvement: Ridership, Energy	Continue to monitor. Post-pandemic recovery continues on STA's express routes as they strive to recover riders. Boardings per revenue hour increased 57% over 2022.
<b>190 Valley Express</b> Areas of improvement: Ridership, Energy	Continue to monitor. Post-pandemic recovery continues on STA's express routes as they strive to recover riders.
<b>633 Geiger Shuttle</b> Area of improvement: Energy	The route performs very well in terms of Ridership and Fares. However, the energy standard will be difficult to meet due to the short route length thereby producing very low average trip lengths which produces lower annual passenger miles. Passengers can only travel limited distances on this route.
<b>661 EWU Express</b> Area of improvement: Energy	Continue to monitor. Consider modifying energy benchmark
<b>664 EWU South Hill Express</b> Area of improvement: Energy	Continue to monitor. Consider modifying energy benchmark
<b>724 Liberty Lake Tech Express</b> Area of improvement: Ridership, Energy	Continue to monitor. Ridership is similarly low to Route 74. Pandemic recovery continues to impact STA express routes.

Route	Improvement Concepts
<b>771 Mirabeau Express</b> Area of improvement: Ridership, Energy	Continue to monitor. Ridership is similarly low to Route 74. Pandemic recovery continues to impact STA express routes.

## Route Indicators

The tables below show various annual indicators related to 2023. These indicators include route length, seated capacity, revenue hours, revenue miles, unallocated cost, average passenger trip length, passenger boardings, passenger miles, and annual fare revenue by route.

### Route Indicator Definitions

Table 4

Indicator	Description
<b>Route Length</b>	One-way distance of the dominant outbound pattern during the weekday peak period. Note that some routes have many different patterns used at different times of day or different days of the week.
<b>Seated Capacity</b>	The number of seats provided on the coach size and type typically used on the route.
<b>Revenue Hours</b>	The number of hours buses travel during scheduled trips for a given route. This time does not include out-of-service time.
<b>Revenue Miles</b>	The number of miles buses travel during scheduled trips for a given route. This does not include out-of-service miles.
<b>Unallocated Cost</b>	Expenses associated with fixed-route operations only. This includes the benefits and wages of coach operators, maintenance, and supervisors. This also includes fuel costs. This is calculated by multiplying the route revenue hours by the unallocated cost per hour (obtained from Finance). For the year 2023, the unallocated cost per hour was \$137.48.
<b>Average Passenger Trip Length</b>	The average distance ridden for an unlinked passenger trip computed as passenger miles traveled divided by unlinked passenger trips.
<b>Passenger Boardings</b>	A single passenger getting on a transit vehicle or continuing to a subsequent trip (i.e., ride-through).
<b>Passenger Miles</b>	The cumulative sum of the distances ridden by each passenger.
<b>Fare Revenue</b>	All income received directly from passengers, paid either in cash or through pre-paid tickets, passes, etc.

## 2023 Route Indicators

Table 5 – Service/Cost Indicators

Route	Route Name	One Way Route Length	Typical Seated Capacity	2023 Revenue Hours	2023 Revenue Miles	2023 Unallocated Cost
*1	City Line	5.79	37	16,486	127,224	\$2,266,494.62
4	Monroe/Regal	11.69	39	39,332	442,876	\$5,407,352.95
6	Cheney	20.46	62	24,638	494,596	\$3,387,174.10
11	Plaza/Arena Shuttle	1.05	26	4,713	31,348	\$647,931.92
12	Southside Medical Shuttle	3.35	26	10,562	73,295	\$1,452,000.54
*14	South Adams/Napa	4.87	39	5,586	60,730	\$767,998.83
20	SFCC	3.95	39	9,825	134,994	\$1,350,710.91
21	West Broadway	2.98	39	13,262	117,021	\$1,823,245.38
22	Northwest Boulevard	5.08	39	7,911	97,837	\$1,087,599.84
23	Maple/Ash	9.09	39	12,708	174,376	\$1,747,139.54
25	Division	9.18	62	33,824	374,438	\$4,650,134.73
26	Lidgerwood	8.49	39	13,664	156,120	\$1,878,500.31
27	Crestline	9.95	39	16,102	218,650	\$2,213,643.28
28	Nevada	8.59	39	13,249	155,867	\$1,821,423.79
29	S.C.C.	4.23	39	4,592	43,756	\$631,356.59
32	Trent/Montgomery	8.39	32	11,318	156,889	\$1,556,012.25
33	Wellesley	9.71	39	27,831	393,133	\$3,826,124.85
34	Freya	5.05	39	10,567	103,374	\$1,452,713.14
35	Francis/Market	8.35	39	10,601	151,571	\$1,457,414.91
36	North Central	6.87	39	11,135	129,024	\$1,530,755.14
39	Minnehaha Loop	8.28	32	6,437	78,059	\$884,910.60
42	South Adams	1.73	32	2,327	16,330	\$319,926.38
43	Lincoln/37th Avenue	7.78	39	10,671	145,470	\$1,467,006.33
45	Perry District	4.19	39	8,568	93,847	\$1,177,916.39
60	Airport	7.67	32	10,124	151,433	\$1,391,798.68
61	Highway 2/Fairchild	13.64	39	17,617	304,369	\$2,422,005.80

## Section II: Passenger Facilities Performance

### Top Bus Stops for Boarding Activity – 2023

The following table indicates the top ten weekday boarding locations for bus stops in 2023 that are not associated with an off-street transit center or station, including park and ride lots. Beginning in 2023, boarding data is now compiled from onboard Automatic Passenger Counters (APCs) instead of onboard route surveys. Stops at end of line layover locations are excluded since APCs count operator activity at the stop level and add operator boarding movements to the stops, producing anomalous averages. Average weekday boarding numbers are calculated from total rides at the stop over how many weekdays the stop was in-service. A full list of bus stop performance is included in the appendix.

Table 7

Rank	Stop Name	DIR	Routes Served	Average Weekday Boardings	
				2023	2022
1	Eagle Station Bay 2	IB	6 Cheney, 66 EWU, 661, 662, 663, 664 EWU Express North, South & VTC	322	344

## Recent Capital Improvements

Spokane Transit uses local, state, and federal funds, (or a combination of) to improve and maintain bus stops and associated amenities throughout the service area. The following projects were completed in 2023:

### Passenger Improvements

#### 2023 Service Improvements

Spokane Transit used local, state, and federal funds to add and improve existing bus stops, amenities, and to enhance the customer experience throughout the service area. To support recent service changes and to accommodate ridership demands at select bus stops, 42 existing stops were improved. The improvements include accessible boarding and alighting, signage, sidewalk connections, shelter pads and High-Performance Transit (HPT) amenities at select locations. Additionally, 65 new stops (33 of which are City Line station stops with 2 additional layover locations) were constructed or implemented as part of planned service improvements. Below is a summary table of all stops constructed or improved with each associated improvement listed in detail below that:

Description	Number of Stops improved or constructed in 2023	Count of New/Existing Stops by Improvement Type							
		ADA Boarding pad	Lighted passenger shelter(s) with seating	HPT Markers with real time digital signage	Trah can(s)	Leaning rail	Related pedestrian enhancements	Area lighting	Separated bike lane enhancement
City Line stops	33	33	33	33	33	33	0*	33	0*
Other new stops	32	27	0	0	0	0	5	0	0
Existing stops	42	18	8	24	9	11	5	6	2
<b>Total</b>	<b>107</b>	<b>78</b>	<b>41</b>	<b>57</b>	<b>42</b>	<b>44</b>	<b>10</b>	<b>39</b>	<b>2</b>

\*City Line's significant enhancements to pedestrian infrastructure and bicycle facilities were completed prior to 2023 (each stop had a variety of investments; see details below)

**Examples of Investments Include:**

**City Line Completion & Launch**

(Main & Howard City Line Station in Downtown Spokane)

The construction of the vertical elements of City Line stations began in 2022, continuing into 2023. All 33 new station stops opened for revenue service on July 15. Stations are served by 60-foot battery electric buses with peak service frequency initially every 15 minutes, increasing in 2024 to every 7.5 minutes. Station amenities include near-level boarding, off-board ticketing, real-time signage, and distinctive local art. This is the first Bus Rapid Transit line in Eastern Washington.

(City Line Bus at the Spruce & 2nd Station in Browne's Addition)

### **High-Performance Transit (HPT) Stop Improvements**

Thirty-nine (39) stops were improved to HPT standards along routes 4 and 6, including Plaza bays, West Plains Transit Center, South Hill Park and Ride, Four Lakes Station, K Street Station, and the Jefferson Street/I-90 Park & Ride.

(Jefferson Street/I-90 Park and Ride HPT Stop Improvements)

## Operational Improvements

### **Pence-Cole Valley Transit Center: New Entrance**

This improvement was made to reduce the travel time of Route 90 as part of Sprague HPT improvements. An entrance was created from Appleway Blvd directly into the Valley Transit Center, no longer requiring coaches to turn on to University Rd to access this facility, reducing travel time and turning movements.

(Pence Cole Valley Transit Center, new Appleway Blvd entrance)

### **South Hill Park & Ride:**

Spokane Transit completed improvements to access and circulation at this facility to improve its efficiency and capacity for transit vehicles. Construction included a new bus bay for Route 4 and the addition of new shelters and amenities, digital signage, HPT markers, and lighting.

(South Hill Park and Ride, Bay 1)

## Park and Ride Lots

Spokane Transit operates fourteen park and ride locations within the service area. Eight are owned by Spokane Transit, two are leased, while the remaining four are made possible by cooperative agreements. Typically, a cooperative agreement includes Spokane Transit contributing to the maintenance and snow removal of the lot.

Spokane Transit collects park and ride utilization data with routine surveys conducted by Spokane Transit Security personnel. Counts performed by security staff are conducted multiple times each weekday with a minimum of one count during the peak period when utilization of the lot is typically highest (exception: counts may or may not be conducted daily at outlying lots such as K Street Station in Cheney depending on staff availability). The charts that follow indicate the 85<sup>th</sup> percentile data related to park and ride counts. The COVID-19 pandemic may have established habits that continue to impact park and ride usage in 2023. Some employers now offer employees more flexible work schedules than were offered pre-Pandemic, including remote or hybrid employment options. Additionally, universities and colleges continue to offer remote learning options for a variety of courses. This approach impacts many aspects of the post-COVID workforce including rider routines and transit commute patterns.

## Owned/Leased Facilities

### Five Mile Park and Ride

City	Location	Available Parking Spaces
Spokane	Ash Street and Five Mile Road	99

Five Mile Park and Ride is served by Routes 4 Monroe/Regal and 662 EWU North Express. Peak service on weekdays includes four buses an hour departing to downtown Spokane and two morning departures to Cheney/EWU when EWU is in session. Five Mile Park and Ride averaged 129 boardings per average weekday in 2023.

**Hastings Park and Ride**

City	Location	Available Parking Spaces
Spokane	Hastings Road and Mayfair Road	135

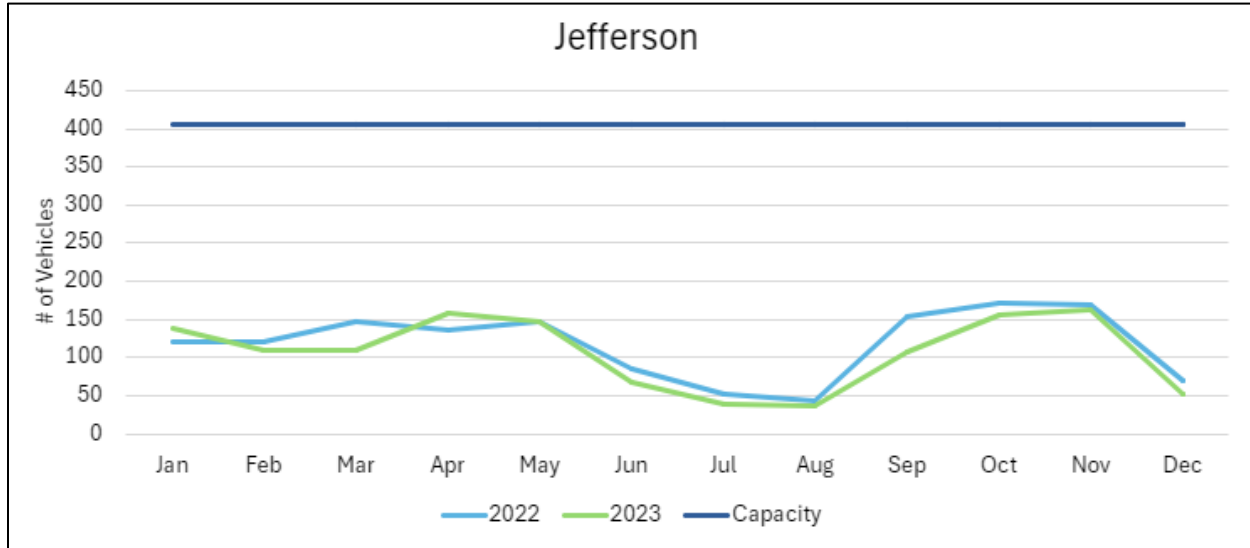

Hastings Park and Ride is served by Routes 25 Division, 124 North Express, and 662 EWU North Express which has two morning departures when EWU is in session. Route 25 provides 15-minute peak frequency and thirty-minute frequency on nights and weekends. Route 124 operates on weekdays at peaks only. There were 290 boardings per average weekday in 2023. The lot is owned by WSDOT.

**Jefferson Lot**

City	Location	Available Parking Spaces
Spokane	Jefferson Street between 3 <sup>rd</sup> and 4 <sup>th</sup> Avenues	406

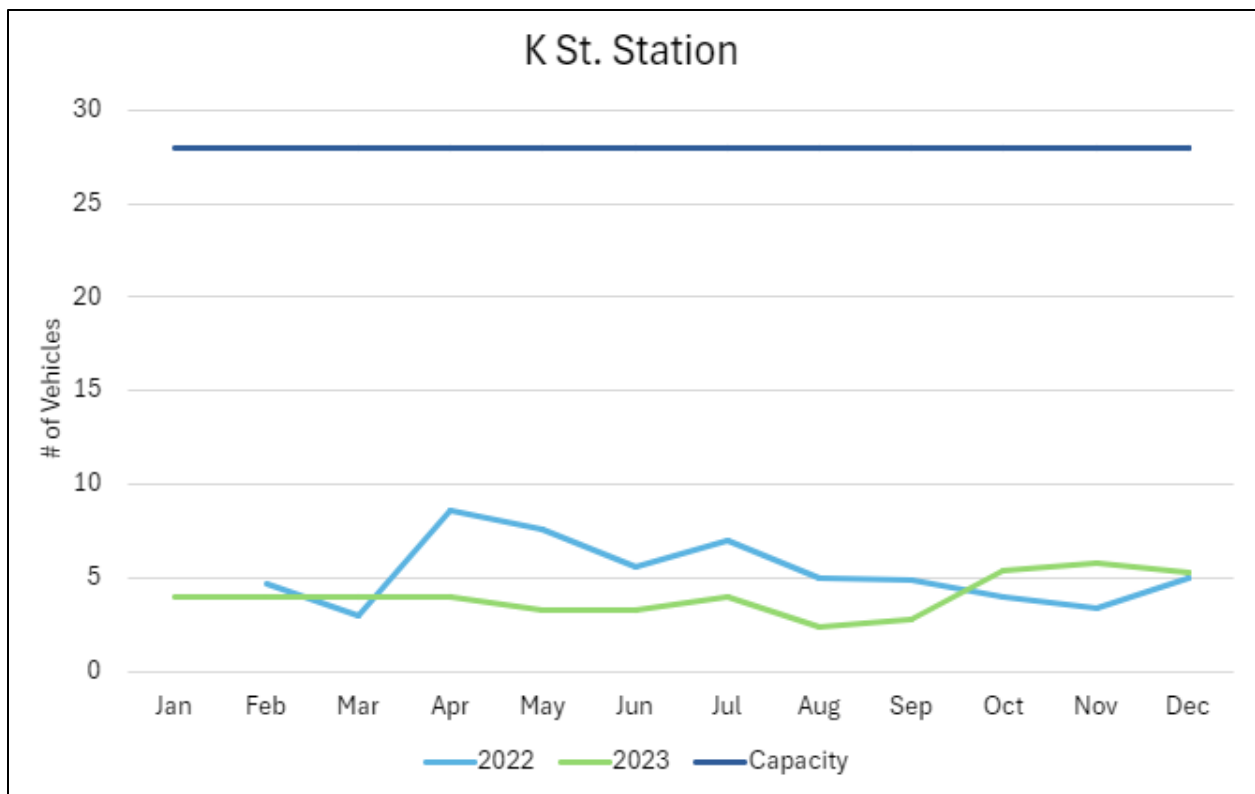

The Jefferson Lot is served by Routes 6 Cheney, 43 Lincoln/37<sup>th</sup> Ave (operates adjacent to the lot), 62 Medical Lake (select trips), 66 EWU, 633 Geiger Shuttle (select trips), 661 EWU Express and 664 EWU South Hill Express. Routes 6 and 66 connect downtown Spokane and Cheney/EWU via the Jefferson Lot and the West Plains Transit Center. Route 661 provides five weekday express trips from the Jefferson Lot Park and Ride to EWU when EWU is in session and several late-morning/afternoon return trips from Eastern Washington University to downtown Spokane. Route 664 provides two weekday express trips from the South Hill Park and Ride to Eastern Washington University. On average there were 177 boardings per average weekday in 2023. The lot itself is owned by WSDOT.

**K Street Station**

City	Location	Available Parking Spaces
Cheney	K Street and 1 <sup>st</sup> Avenue	28

K Street station is served by Routes 6 Cheney, 67 Swoop Loop, and 68 Cheney Loop. Route 6 serves K Street Station on improved 30-minute service. Routes 67 and 68 provide service every 30 minutes on EWU school days with Route 68 operating every day throughout the year. There were 125 boardings per average weekday in 2023.

**Liberty Lake Park and Ride**

City	Location	Available Parking Spaces
Liberty Lake	E Mission Avenue and Meadowwood Lane	165

The Liberty Lake Park and Ride is served by Routes 74 Mirabeau/Liberty Lake, 98 Liberty Lake via Sprague, 172 Liberty Lake Express and 724 Liberty Lake Tech Express. Route 74 provides 30-minute weekday peak frequency between the Liberty Lake Park and Ride and downtown Spokane stopping at the Mirabeau Park and Ride in Spokane Valley. Route 98 provides 30-minute peak frequency and hourly service on nights and weekends between the Liberty Lake Park and Ride and the Valley Transit Center via Sprague Ave. Route 172 provides three non-stop trips from the park and ride to downtown Spokane in the morning and five non-stop trips from downtown Spokane to the park and ride in the evenings on weekdays. Route 724 provides service to Liberty Lake Park and Ride with five morning trips from downtown Spokane and 5 evening return trips. There were 160 boardings per average weekday in 2023.

**Mirabeau Point Park and Ride**

City	Location	Available Parking Spaces
Spokane Valley	13209 E. Indiana Avenue	198

Mirabeau Point Park and Ride is served by Routes 32 Trent/Montgomery, 97 South Valley, 74 Mirabeau/Liberty Lake and 771 Mirabeau Express. These routes provide customers with various trip options to include direct service to Spokane Community College via Route 32, access to the Sullivan corridor, two high schools and the Valley Transit Center via Route 97, direct service to downtown Spokane via Route 771 as well as access to downtown Spokane, Greenacres, and Liberty Lake and service to the Providence Medical Park via Route 74. On average, there were 120 boardings per weekday in 2023.

**Pence-Cole Valley Transit Center (VTC)**

City	Location	Available Parking Spaces
Spokane Valley	4 <sup>th</sup> Avenue and University Road	236

The VTC is served by Routes 90 Sprague, 95 Mid-Valley, 96 Pines/Sullivan, 97 South Valley, 98 Liberty Lake via Sprague, 173 VTC Express, and 190 Valley Express. Route 90 offers 15-minute peak frequency while Routes 95, 96, 97, 98, 173, and 190 (three trips daily) all offer 30-minute peak frequency. Route 90 provides 30-minute frequency nights and weekends while Routes 95, 96, 97, and 98 offer hourly service. The VTC continues to be a key location within the Spokane Transit system with 820 boardings per average weekday in 2023.

**South Hill Park and Ride**

City	Location	Available Parking Spaces
Spokane	31 <sup>st</sup> Avenue and Southeast Boulevard	98

The South Hill Park and Ride is served by Routes 4 Monroe-Regal line, 34 Freya, 43 Lincoln/37<sup>th</sup> Avenue, 45 Perry District, 247 Lincoln Park/Ferris and 664 EWU South Hill Express. Routes 34, 43, and 45 offer 30-minute peak frequency and Routes 4 and 144 offer 15-minute peak frequency. Introduced in July 2023, Route 247 provides weekday peak-only service with five morning outbound-only trips from downtown and seven inbound-only trips in the PM peak from the South Hill Park and Ride. Route 664 departs the park and ride twice each EWU school day morning. Route 4 operates with 30-minute frequency on nights and weekends. There were 352 boardings per average weekday in 2023.

**West Plains Transit Center**

City	Location	Available Parking Spaces
Spokane	10810 Westbow Road	200

The West Plains Transit Center is served by Routes 6 Cheney, 62 Medical Lake, 63 Airway Heights/West Plains, 66 EWU, and 633 Geiger Shuttle. This transit center serves as the main western connection hub between the communities of Spokane, Cheney, Four Lakes, Medical Lake, Airway Heights and the unincorporated areas of the West Plains. The West Plains Transit Center opened in September 2018. The lot has ample capacity with space for up to 200 vehicles. There were 383 boardings per average weekday in 2023, making it one of STA’s busiest passenger facilities outside of the City of Spokane.

**Moran Station**

City	Location	Available Parking Spaces
Spokane	5625 S. Palouse Highway	100

Moran Station is served by Routes 4 Monroe-Regal and 144 South Express. Route 4 Monroe-Regal provides 15-minute service on weekdays and 30-minute service on weekends to north Spokane via downtown Spokane. Route 144 South Express provides 15-minute service to downtown Spokane during weekday peak commute times. Moran Station opened in March 2020 with 100 available parking stalls for residents in the southeast Spokane area. There were 129 boardings per average weekday in 2023.

## Cooperative Facilities

### Arena Lot

City	Location	Available Parking Spaces
Spokane	W Boone Avenue and Howard Street	538 (2022) 564 (2023)

The Arena Lot is served by the Route 11 Plaza/Arena shuttle which provides ten-minute peak frequency on weekdays only. Customers who choose to park at the Arena Lot can purchase a monthly parking/shuttle pass for \$40.00. The monthly pass provides unlimited travel on shuttle vehicles. Due to One Spokane stadium construction and construction of a new lot on the north side of Boone Avenue, customers have been forced to park south of Boone Avenue at the existing Spokane Arena parking lot. The new lot with a new stop is expected to open summer of 2024. There were 135 boardings per average weekday in 2022, down to 53 in 2023 due to construction impacts.

**Airway Heights Park and Ride**

City	Location	Available Parking Spaces
Airway Heights	SR 2 (in front of Yoke’s Foods)	22

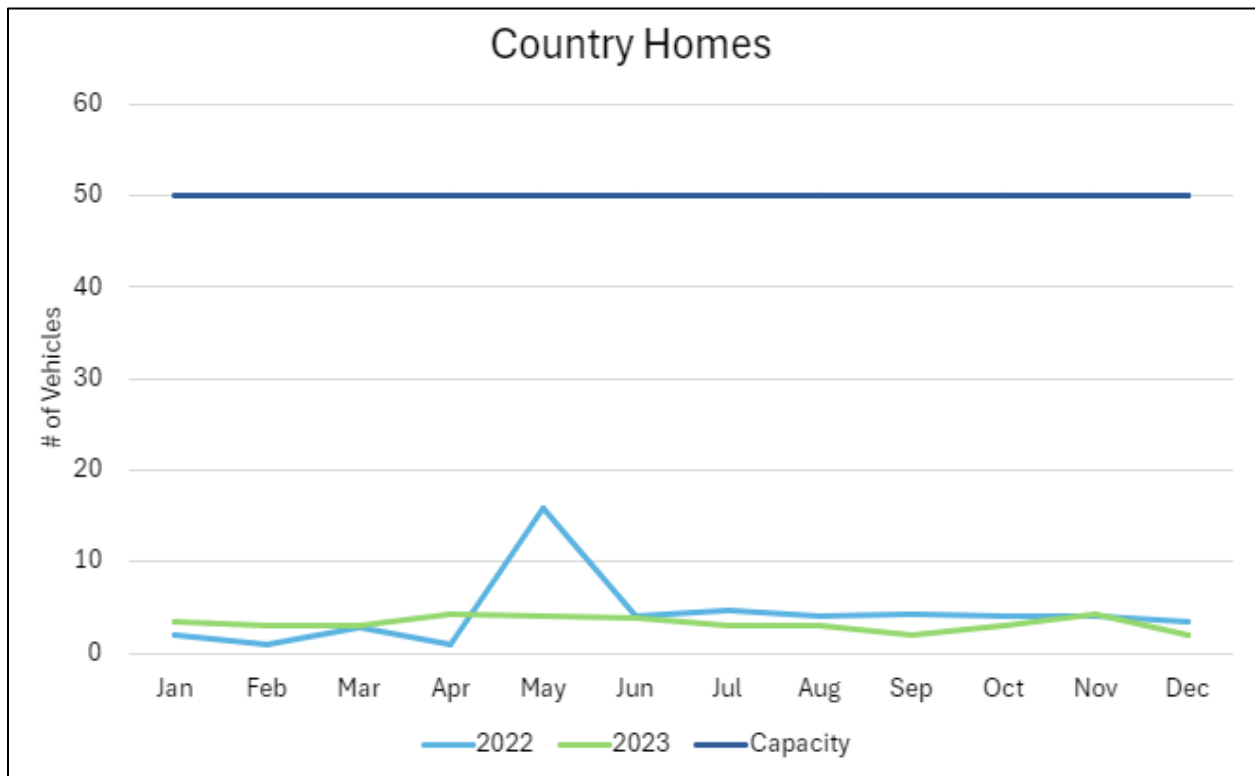

Airway Heights Park and Ride is served by Routes 61 Highway 2 via Browne’s Addition, 60 Airport via Browne’s Addition, and 63 Airway Heights/West Plains. Route 61 provides 30-minute peak frequency on weekdays and hourly service on nights and weekends. Route 60 serves Airway Heights hourly on weeknights and weekends. Route 63 provides 60-minute frequency between Airway Heights and the West Plains Transit Center (WPTC). There were 66 boardings per average weekday in 2023.

**Country Homes Christian Church**

City	Location	Available Parking Spaces
Spokane	Wall Street and Country Homes Boulevard	50

In cooperation with the Country Homes Christian Church, Spokane Transit offers 50 parking spaces to customers of the Route 124 North Express. There were 8 boardings per average weekday in 2023. In 2019, Spokane County constructed a marked, signalized crosswalk which allows for safer pedestrian access to and from the bus stop; however, ridership remains low at this location.

**Fairwood Lot**

City	Location	Available Parking Spaces
Spokane	511 W. Hastings Road	200

The Fairwood Lot is served by Route 124 North Express on weekday peaks only. Parking at the Fairwood Lot is made possible via a lease agreement with the Calvary Chapel church and serves as an overflow lot for the Hastings Park and Ride. The lot has ample capacity with space for up to 200 vehicles. There were 16 boardings per average weekday in 2023.

## Bike Lockers

Spokane Transit provides bike lockers at certain park and ride lots for customers who wish to ride their bike as well as access the fixed-route system. All Spokane Transit buses have the capability of holding three bicycles on racks mounted on the front of the bus. Note: Jefferson Park & Ride bike lockers were removed in February 2022 due to vandalism.

Bike lockers are available for \$5.00 per month with a minimum rental of three months required. A \$25.00 refundable key deposit is required. The table below shows the locker availability as of April 2024.

Table 8

<b>Location</b>	<b>Total Bike Lockers Available</b>	<b>Total Bike Lockers Rented</b>
<b>Hastings Park &amp; Ride</b>	6	0
<b>Liberty Lake Park &amp; Ride</b>	16	4
<b>Mirabeau Point Park &amp; Ride</b>	6	0
<b>South Hill Park &amp; Ride</b>	6	1
<b>Valley Transit Center</b>	12	3

## Section III: Universal Transit Access Pass (UTAP)

---

This section is intended to make available the going rates for services provided under the Universal Transit Access Pass (UTAP) Program effective July 1, 2024.

According to Spokane Transit’s Tariff Policy, UTAP is an annual program made available on a contractual basis in which all members of an organization have unlimited access to STA services. The organization pays a fee that allows all identified members of their organization to use STA services for the contracted time period. Eligible participants must be identifiable by an identification card that is readable by STA fare collection equipment. The number of these programs is dependent on the capacity of STA’s fare collection equipment.

The contract price is based on each unlinked trip taken by members of the program. The charge for each unlinked trip is calculated based on an established rate for each route in STA’s system. A rate sheet for each route is published annually and included in the annual contract update.

The participating organization is billed monthly for the previous month’s trips. However, to allow participating organizations to budget, contracts will also include a “not to exceed” total price for an annual contract. The “not to exceed” fee will be calculated by STA prior to each contract period. Actual monthly ridership may result in the cost of the contract to be lower than the “not to exceed” fee.

### UTAP Rates Calculation

Overall, the UTAP direct utility rates are based on the direct expenses required to provide a typical unlinked passenger trip by each route, applying direct operating expenses to the seated capacity of buses in service. This cost per seat mile calculated for each route is applied to the average passenger trip length to arrive at the expenses directly utilized by a passenger. Additionally, a base rate is applied uniformly to all routes that considers the expenses incurred in directly administering fixed-route operations, including dispatching, road supervisors and scheduling. The base utility rate calculation for 2023 data is shown below.

$$\text{Base Utility Rate (B)} = \frac{\text{Base Expenses}}{\text{Passengers}} = \frac{\$5,582,323}{8,947,157} = \frac{\$0.62}{\text{passenger}}$$

There are several steps and many variables that are used to generate each route’s direct utility rate. The first step is to determine direct expenses for each route by applied uniform direct costs per revenue hour and revenue mile commensurate on actual revenue hours and revenue miles operated in a year. The common inputs for this variable are shown below using 2023 NTD

reported annual data. Route-specific revenue hours and revenue miles data for 2023 can be found in Section I of this report.

$$\text{Direct Cost per Revenue Hour (R)} = \frac{\text{Direct Operating Expenses}}{\text{Revenue Hours}} = \frac{\$45,645,476}{494,282} = \frac{\$92.35}{\text{revenue hour}}$$

$$\text{Direct Cost per Revenue Mile (M)} = \frac{\text{Direct Maintenance Expenses}}{\text{Revenue Miles}} = \frac{\$16,725,384}{6,824,002} = \frac{\$2.45}{\text{mile}}$$

$$\text{Direct Route Expenses (D}_n\text{)} = \text{R} \times \text{Route Revenue Hours} + \text{M} \times \text{Route Revenue Miles}$$

Next, route expenses are applied to the seat miles provided by each route based upon the total revenue miles traveled for each route multiplied by the seated capacity of the typical coach size and type used on a route. Route-specific seated capacity for 2023 can be found in Section I of this report.

$$\text{Route Seat Miles (S}_n\text{)} = \text{Route Revenue Miles} \times \text{Route Seated Capacity}$$

$$\text{Route Direct Cost per Seat Mile (C}_n\text{)} = \frac{\text{D}_n}{\text{S}_n}$$

Finally, the direct utility rate is determined by multiplying the direct cost per seat-mile by the average passenger trip length calculated for that route. Average passenger trip length by route for 2023 is found in Section I of this report.

$$\text{Route Direct Utility Rate (U}_n\text{)} = \text{C}_n \times \text{Route Average Passenger Trip Length}$$

The base utility rate (*B*) is then subtracted from the cost of an adult single ride fare (\$2.00) to calculate a not-to-exceed rate. Based on 2023 data, the direct utility rates for Routes 6, 62, 74, 124, 172, 173, 190, 661, 662, 663, 664, 724 and 771 were capped at \$1.38 in accordance with this methodology. It should be noted that Paratransit trips taken in the UTAP program are charged the full rate of an adult single rider fare (\$2.00). Direct Utility Rates fluctuate based on changes in measured passenger patterns, while the Base Utility Rate is influenced by aggregated ridership demand.

## UTAP Rates Schedule

Based on the preceding variables and data for calendar year 2023, the UTAP direct utility rates effective July 1, 2024, are published below.

UTAP Direct Utility Rates - Effective July 1, 2024		
Route	Route Name	Direct Utility Rate (per Boarding)
1	City Line	\$ 0.90
4	Monroe/Regal	\$ 0.86
6	Cheney	\$ 1.38
11	Plaza/Arena Shuttle	\$ 0.70
12	Southside Medical Shuttle	\$ 1.08
14	South Adams/Napa	\$ 0.45

# 2023 Average Weekday Boardings

## 2023 Average Weekday Boarding Activity by Stop

The data shown below is based on compiled Automatic Passenger Counters (APC) data instead of onboard route surveys, as was the Annual Performance Report standard prior to this year's report. Boarding and Alighting activity is automatically recorded at each stop along a route by on-board sensors. The data in the following table shows the combined boarding activity of all routes that serve the stop. The bus stop numbers shown correspond with the numbering system (stop IVR number) used for customer information. These numbers are calculated using total rides at the stop divided by how many weekdays the stop was in-service.
